

CSE 841: Artificial Intelligence

Project Deliverables Fall 2020

1 Project Writeup (10 points)

- The project writeup is due by email to the instructor (kjl@msu.edu) by 5:00 pm Eastern Standard Time (EST) on December 18, 2020. Please send the writeup in PDF format.
- The project writeup should be approximately 10 pages in length. Please format text in 11 point font with double-spacing. Margins should be one inch on all sides.
- Hint: a good figure is worth thousands of words.
- A suggested outline for the manuscript is as follows:
 1. Introduction and motivation
 2. Formal statement of the computational problem
 3. Related publications and computational methodologies addressing the problem of interest
 4. Algorithmic details and software implementation details
 5. Experimental design and datasets
 6. Results
 7. Conclusions
 8. Important open questions remaining for future work

2 Project Presentation (10 points)

- Presentations should be approximately 10 minutes long.
- Create Powerpoint/Latex/Keynote slides for your talk. Some advice on giving scientific talks can be found at:
 - <https://www.perl.com/pub/2004/07/30/lightningtalk.html>
 - <http://scottberkun.com/2009/how-to-give-a-great-ignite-talk/>
 - <https://barriebyron.wordpress.com/2013/02/17/so-you-want-to-give-a-lightning-talk/>
- Record a video of your talk, and then upload the video to MSU Media Space (mediaspace.msu.edu).
- You must submit a copy of your slides and the MSU Media Space video link to the class D2L Assignments webpage by 11:59 pm EST on December 13, 2020.
- Selected presentation videos will be screened in class on December 15. A total of 30% of the presentation score will be based on attendance and participation during the scheduled final exam period's screening session. Participation

credit will be given for either asking a question about a screened presentation or answering a question about one's presentation (if selected for screening).
